EDUCATION

Tacoma, WA	University of Washington, Tacoma	2013 – 2016

Degree: BS – Computer Science and Systems
GPA: 3.47
Dean's List: 4 out of 8 quarters
- Specialized in Java.
- Worked in teams to design and build.
- Created games, apps, databases.

Lakewood, WA	Pierce Community College	2010 – 2013

Degree: General AA
- Obtained during high school through running start.

PROJECTS

Front End	YOUR DAY IN BRIEF	Winter 2021

- Collaborated with a team of three others to build a full client-side application powered by a handful of third-party APIs.
- The site is a news dashboard along with weather for the five-day forecast. It was designed to be concise without all the bloat that comes from most news sites nowadays.
- Built with the expected HTML, CSS, JavaScript as well as Bulma for a CSS framework and jQuery.

Databases/Android	DESTINY GUNS	Spring 2015

- Worked with one classmate to create an Android mobile application that accessed a MySQL database of gear from the video game 'Destiny', allowing users to have an account, browse all the gear in the database, have personalized lists, view and rate each piece of gear.
- The app and local databases were built in Java using android studio, the app layouts, and UI in XML also in android studio, PHP which was hosted to access the database, and a MySQL database also hosted to house all the information on each piece of gear.
- This project was built to fulfill the final project requirements of two separate classes in tandem, creating an exceptionally large and challenging project. To get the database and the app to work together, I had to teach myself PHP and then had to manage all the information being returned to only show the relevant data to the user, which created the most satisfying challenge.

CURRENT EMPLOYMENT

Supervisor/Lead	Pierce County Parks & Rec	2017 – Present

- Make change for the control room staff and count the safe at the end of the shift.
